

OXYRIDGE FARMS

@ NARAYANKHED, SANGAREDDY

A project by
NEEMSBORO FARMS PVT. LTD.

A MAGNIFICENT 150-ACRE PROJECT

Investment in land is a long-term plan. It is considered the best investment option. Since the world's most popular & costliest wood is sandalwood, we choose sandalwood as our plantation project along with Sandalwood, Malabar trees, Mahogany and other seasonal fruits and vegetables.

- **Sandalwood** or **Chandanam** is also known as 'Wooden Gold'. It has a huge demand worldwide and India is blessed with the ideal climatic conditions for growing it. The Indian variety has the highest quality of oil which increases its demand in the worldwide market.
- **Malabar Neem** belongs to the neem family. It can be cultivated in all types of soil and requires a low water supply. It has a unique feature of growing to 40 feet within 2 yrs of planting. A tree with 1.2 mts. girth is saleable at Rs.10,000 / tonne.
- **Mahogany** is the species from which the original mahogany wood was produced. It is grown as plantation tree and sold in timber markets in all over India. An exceptionally durable hardwood, it is the ideal choice for furniture and fittings around the home.

Project Highlights

Sandalwood trees
Malabar Neems
Mahogany
Seasonal fruits & vegetables

- 30' & 20' internal roads
- The land is fenced with barbed wire
